Freelancer
Software engineer
(July 2012 - Present)

I started working on side projects as a freelancer in 2012. Since 2015 its my main occupation.

PROJECT HIGHLIGHTS

Lisa Erp
https://projects.sarkozibalazs.dev/lisa-erp

Lisa Erp is a custom erp system. It handles the daily operations of a company employing 40+ people, including retail, ecommerce, inventory and warehouse management, finance, etc.
Technologies: Php, Javascript

Abacus
https://projects.sarkozibalazs.dev/abacus-procurment-support

Abacus is a dropship support tool, integrates 14 hungarian distributors, handling over 200.000 products real-time. The system is capable of tracking individual product stock status, price changes across every distributor and can manage connected retailer database. Abacus is managed through Terraform, can automatically deploy and scale.
Technologies: Php, Laravel, Terraform

Simpl@ eCommerce engine
https://github.com/garel/simple-shop

Simple shop is a simple ecommerce engine, built with Laravel and Jetstream. Jetstream is a new Laravel 8 frontend scaffolding, with optional stacks. The project uses the inertiajs stack with vue. The engine is a demo / experimental SPA
